Biodiversity Knowledge Sharing

# Media

- Currently (2025-05-22), the OpenSites can share image and audio files.
- Currently (2025-05-22), only image files are available.
- Scientific name: This can be at any rank. The creator's name, if a contributor to the site, must be entered with the last name first.
- Common name: Can be used, but relatively few have been entered.

A screenshot of a web form titled "Media Search". The form is organized into several sections. The "Search Criteria" section at the top includes a "Scientific Name" dropdown menu, a text input field, and a checked checkbox for "Include Synonyms". Below this is a "Creator:" dropdown menu and a "Media Tags:" section with a "with" dropdown and another text input field. The "Media Resource Counts" section contains three radio button options: "All Media" (selected), "One per taxon", and "One per specimen". The "Resource Type" section has three radio button options: "All Media" (selected), "Specimen/Vouchered Media", and "Field Media (lacking specific locality details)". The "Media Type" section has three radio button options: "Image", "Audio", and "All" (selected). At the bottom of the form, there is a "Count per page:" dropdown menu set to "200" and a green "Load Media" button.
